

Hridhikjal S B

Data Analytics/AI engineer

✉ hridhikjal123@gmail.com ☎ +91 7034 200387 📍 Karnataka 🔗 [linkedin.com/in/hridhikjal-sb-0b1589242](https://www.linkedin.com/in/hridhikjal-sb-0b1589242)

Professional Summary

Data Analyst with hands-on experience in Python, SQL, Excel, Tableau, and Power BI, specializing in data cleaning, exploratory data analysis, dashboard development, and machine learning. Skilled in transforming raw data into actionable insights through interactive visualizations and structured analysis. Experienced in end-to-end analytical workflows, from problem definition and preprocessing to modeling and business-oriented interpretation.

Skills

Programming Languages:

Python, R, SQL, Javascript

Tools & Platforms:

Streamlit, ChromaDB, MySQL, OpenCV, PowerBI, Excel, Tableau

Data science

Statistics, EDA, Machine Learning, Classification

Work Experience

Intern, Mu Sigma

04/2026

Whitefield, Bengaluru

Intern at Mu Sigma, where I contributed to analytics and AI-driven workflow solutions by working on React-based applications, automation processes, and business problem-solving. Collaborated with teams to understand requirements, optimize workflows, integrate tools

Projects

AI-Powered Training & Assessment Scorecard

- Addressed the time-consuming and inconsistent manual assessment evaluation process by automating evaluation and assessment management across multiple subjects.
- Integrated LLM-based evaluation to assess student submissions against predefined evaluation criteria and store evaluation results.
- Implemented an AI-powered assessment workflow to process question papers, answer keys, and student submissions across different subjects.
- Added assessment scheduling, weekly report generation, and trainee data management features to the scorecard system.

Document & Web-Based RAG Chatbot

- Built a RAG-based internal knowledge chatbot to help employees quickly access company policies, training materials, and internal documentation.
- Integrated LangChain, Google Gemini, and ChromaDB to develop the end-to-end retrieval and response generation pipeline.
- Implemented document ingestion, text chunking, embedding generation, and semantic search for accurate retrieval of relevant internal information.
- Developed an interactive Streamlit application for real-time querying and context-aware responses from company documents.

Loan Eligibility Prediction System (Machine Learning + Streamlit)

- Developed a machine learning model to predict loan eligibility
- Performed data preprocessing, feature selection, and model evaluation
- Deployed the application using Streamlit

Education

B.Sc. in Mathematics, SN College

2020 – 05/2023
Kannur, Kerala

M.Sc. in Data Science, Jain University

2024 – 2026
Bangalore

Certifications

Data Science

NACTET (Aug 2022)

Data Visualization with R

Business Analysis & Process Management

Coursera (May 2023)

DATA ANALYTICS WITH SAS

Computer Vision and Image Analytics

Infosys (Dec 2023)
